**DEV IRON
FOUNDRY**

DEV

// Introduction

The industry pertaining to Iron Foundries and its related products is a potential unexplored industry in India. The industry has potential growth and exploration opportunities as there are still only a limited no of suppliers in this area. Dev Iron Foundry was founded way back in the year 2009 to offer a complete range of cast iron and its moulded products.

// Who We Are

Dev Iron Foundry was established in the year 2009, at Jaipur, Rajasthan, India as a sole proprietorship Firm recognised as the prominent manufacturer of the best quality spare parts, Ductile Flanges etc.

We are a leading exporter, manufacturer, wholesaler, supplier, stockist and distributor of a wide range of Cast Iron and Ductile Iron castings.

Dev Iron has been equipped with a modern state of the art technology and machinery and equipment in order to attain clients goals and satisfaction optimally.

The infrastructural facility is made to undergo regular upgradation at fixed intervals of time in order to keep our production efficiency and maximize productivity. Regular updation of machinery enables us to extend our market reach in terms of increased productivity.

We are known and backed for our quality standards owing to our advanced testing facilities. We sell our products in the brand name of Dev Foundry. Since our inception, we have been improving and refining our production units with world class furnaces and moulding technologies.

Mission & Vision

We are founded with the core belief of growing together and win customer's satisfaction with excellence in quality.

// Our Core Values

We keep our values simple stated in easily understandable statements for every associate. They are:-
